Request for Application (RFA) ***Call for Biomarker Research***

WCRF International is issuing a call for proposals on the development and evaluation of biomarkers relevant to the influence of food, nutrition (including body fatness) and physical activity to cancer.

We particularly welcome applications addressing biomarkers of early cellular transformation, or of cancer risk, progression or recurrence, that would be valuable in epidemiological studies or in intervention trials.

We also encourage proposals addressing biomarkers that will provide improved assessment of dietary intake and/or nutritional status including metabolic markers of body fatness or physical activity relevant to cancer risk, progression or recurrence.

Interested investigators with a strong research portfolio in biomarker research should submit a letter of intent. These will be reviewed by an independent expert Panel, and three successful applicants will be invited to submit full applications. **One** proposal will be funded.

Up to £350,000 will be available, over a period of up to 3 years.

The deadline for receipt of the letter of intent is **6 July 2009**. For full details please visit the WCRF International website (www.wcrf.org).
